

EARLY YEARS PERFORMANCE REPORT

This Early Years Performance Report presents a county wide picture of performance with information displayed at District level.

The collated information follows the Best Start Pathway and brings together information from partners to provide a broad picture of performance in the Early Years.

EARLY YEARS REACH

Early Years Reach

Children Centres have a legal requirement to make sufficient early childhood services available to parents and prospective parents in its Reach area/locality. The Early Years Reach will identify what difference the centre makes to the young children and families in the local area it serves.

Early Years Reach 2014/2015

	POPULATIONS					REACH

BUILDING RESILIENT FAMILIES AND COMMUNITIES (BRFC)

BRFC

The aim of the BRFC partnership outcomes plan is to build resilience and raise aspirations within families. Where individuals are experiencing a range of difficulties they are given the resources to draw upon, when faced with future challenges and reduce dependency on public services.

Phase 1 Eligible Families, March 2015

	Eligible Families	Count of people	Eligible families with children 0-4	Count of Children 0-4
Cannock Chase	271	747	20	21

PERSONAL, HEALTH AND SEX EDUCATION (PHSE)

PHSE

Entrust currently have schemes of work for both Primary and Secondary schools on educating children about personal, health and sex education. These include lesson plans for all age groups. 47 primary schools and 31 secondary schools have purchased this scheme.

Number of schools who have purchased PHSE schemes

	Primary School SRE Scheme of work	Secondary School SRE Scheme of work
Cannock Chase	2	0
East Staffordshire	3	1
Lichfield	1	0
Newcastle-under-Lyme	5	9
South Staffordshire	4	1
Stafford	4	0
Staffordshire Moorlands	5	11
Tamworth	23	9
Total	47	31

funded to receive the scheme of work

Training is also available for Primary schools and approximately 8 schools have accessed this each year (over the last 3 to 4 years). Last academic year a conference called “Teenage Kicks” was held for secondary schools. Workshops related to SRE were available as part of this and were well attended.

There is also the Healthy Schools : Healthy Futures programme. Schools who are undertaking this process complete a Health Check with a member of the Behaviour Health and Well Being Team of Entrust. This includes some aspects of SRE such as having a policy in place and including it as part of the PHSE scheme of work. Schools can then go on to full Status and one of the themes they can select for this is SRE. Currently 66 schools are involved in the Healthy Schools : Healthy Futures programme and 9 of these are working on SRE for their status.

Number of schools involved in Healthy Schools: Healthy Futures Programme

TEENAGE PREGNANCY

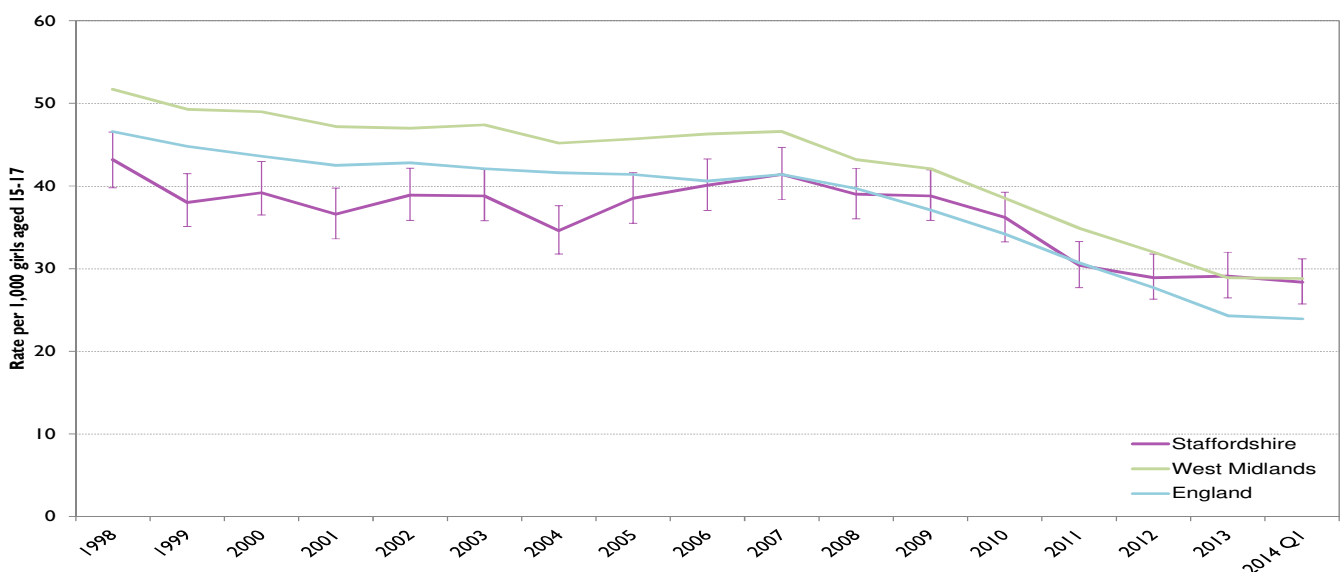

Teenage Pregnancy

Being a teenage parent can have adverse effects on an individual's life chances, for example, teenage mothers often have poor educational attainment and reduced employment opportunities. Teenage Pregnancy is associated with deprivation and young people from lower socio-economic groups tend to have higher levels of teenage pregnancy.

Under-18 Conceptions 2011-2013

	Number of Conceptions			Change Since 2012

MATERNITY SERVICES

Access to Maternity Services

All pregnant women should have prompt access to maternity services. An indicator that measures early access and intervention is the proportion of women who have a health and social risk assessment completed by 12 weeks gestation.

Access to Maternity Services, 2010/11-2012/13

	Number of women accessing services under 13 weeks			Percentage of women accessing services under 13 weeks		
	2010/11	2011/12	2012/13	2010/11	2011/12	2012/13
Staffordshire	8,476	8,637	8,615	91.4%	92.9%	93.3%
West Midlands	60,915	65,337	62,355	87.3%	88.4%	89.4%
England	601,856	624,679	617,633	84.1%	86.1%	86.7%

Access to Maternity Services, 2011/12

The West Midlands Perinatal Institute publishes this indicator as part of the Perinatal Episode Electronic Record (PEER) project. The data below is a sample of approximately 75% of Staffordshire Births at ward level.

	Number of women accessing services under 13 weeks	Percentage of women accessing services under 13 weeks 2011/12
Cannock Chase	853	89.80%
East Staffordshire	952	90.80%
Lichfield	610	91.30%
Newcastle under Lyme	960	92.80%

SMOKING DURING PREGNANCY

Smoking during Pregnancy

Smoking during pregnancy is associated with adverse effects for both the mother and her unborn baby. Women who smoke during pregnancy are at greater risk of giving birth to low birthweight babies. On average babies born to women who smoke during pregnancy are almost half a pound lighter than to women who don't smoke. Smoking during pregnancy also increases the risk of a premature birth, miscarriage and perinatal death.

Mother smoking during pregnancy (estimates), 2009/10-2013/14

	% of women smoking during pregnancy (estimates)					Statistical Difference to England
	2009/10	2010/11	2011/12	2012/13	2013/14

LIVE BIRTHS

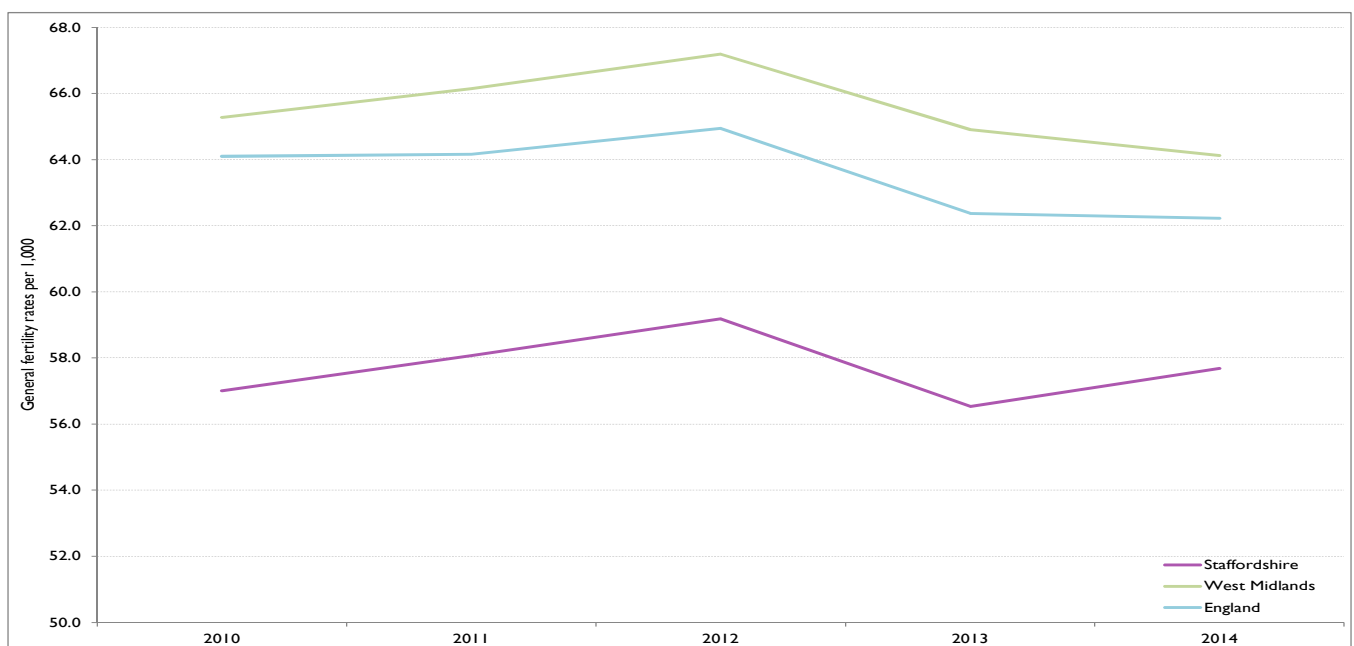

Live Births

General fertility rates (GFRs) are a measure of the number of live births per 1,000 women of child bearing age (conventionally taken as those aged 15-44 years). The number of live births is a useful indicator for the level of maternity and early years care required within an area.

General Fertility Rates, 2010-2014

	Number of live births					General fertility rate per 1,000	Statistical difference to England
	2010	2011	2012	2013	2014		
Cannock Chase	1,150	1,130	1,170	1,170	1,100	59.3	Lower
East Staffordshire	1,440	1,490	1,520	1,380	1,440	69.3	Higher

LOW BIRTHWEIGHT

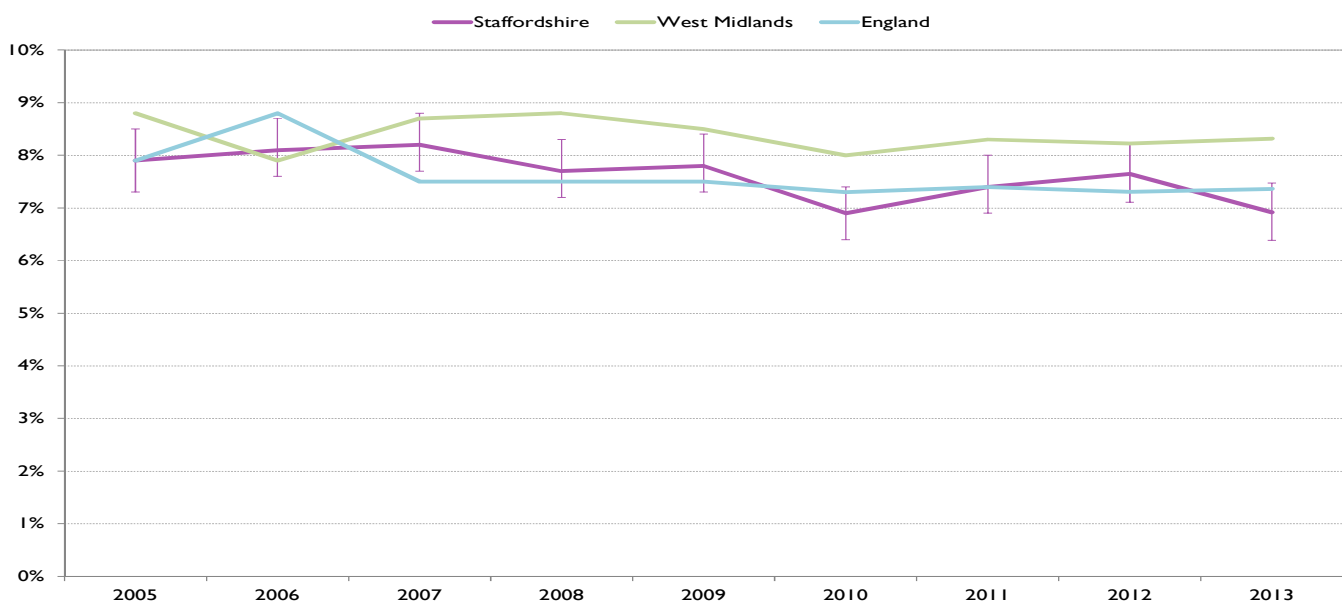

Low Birthweight Babies

Babies weighing less than 2,500 grams at birth are considered to have a low birthweight. The risk of low birthweight is increased with deprivation, poor nutrition, multiple pregnancies, teenage pregnancy, and smoking and drinking during pregnancy. Low birthweight is one of the leading causes of infant illness, disability and death and is a good indicator of poor health experience in both early and later life.

Babies with low birthweight, 2010-2013

BREASTFEEDING INITIATION AND PREVALENCE

Breastfeeding

Breastfeeding has many health benefits for both mother and child. Breastfeeding protects babies against infections and diseases such as asthma and eczema. Breastfeeding also helps protect mothers against ovarian and breast cancer and weak bones later in life. Mothers who breastfeed their babies also return to their pre-pregnancy figure faster. The World Health Organisation (WHO) recommends that mothers breastfeed exclusively for the first six months.

Breastfeeding initiation and prevalence trends 2013/14-2014/15

	Breastfeeding initiation		Statistical difference to England	Breastfeeding prevalence (6-8 weeks)		Statistical difference to England

SUFFICIENCY (THINK2)

Childcare Sufficiency

Childcare sufficiency is a statutory duty under the Childcare Act 2006 in which Local Authorities ensure there are sufficient childcare places to meet the demand of children including those entitled to the free entitlement for two, three and four year olds.

Comparison of eligible families and childcare places between Nov-2013 and Jul-2015

	Nov-13		Jun-14		Oct-14		Jan-15		Jul-15

IMMUNISATIONS

Childhood Immunisations

The immunisation of children is the single most cost-effective form of prevention and protects children against serious diseases. Since 1995 the targets for immunisation uptake have been set at 95% and they are considered by the World Health Organisation to be the only effective means of eradication of vaccine preventable childhood disease.

Number of children immunised by their first birthday, 2013/14

	Number of children aged one	Number of children immunised	Percentage immunised	Statistical difference to England
Cannock Chase	1,204	1,166	96.8%	Higher

PRE-SCHOOL IMMUNISATIONS

Pre-School Immunisations

Pre-school immunisations are due about three years after the child has completed the immunisations they had when they were two, three and four months old and between 12 and 13 months old. These immunisations will make sure that the child has the best protection against serious childhood diseases as they grow up.

Number of children immunised by their fifth birthday, 2013/14

	Number of children aged one	Number of children immunised	Percentage immunised	Statistical difference to England

CHILDHOOD OBESITY

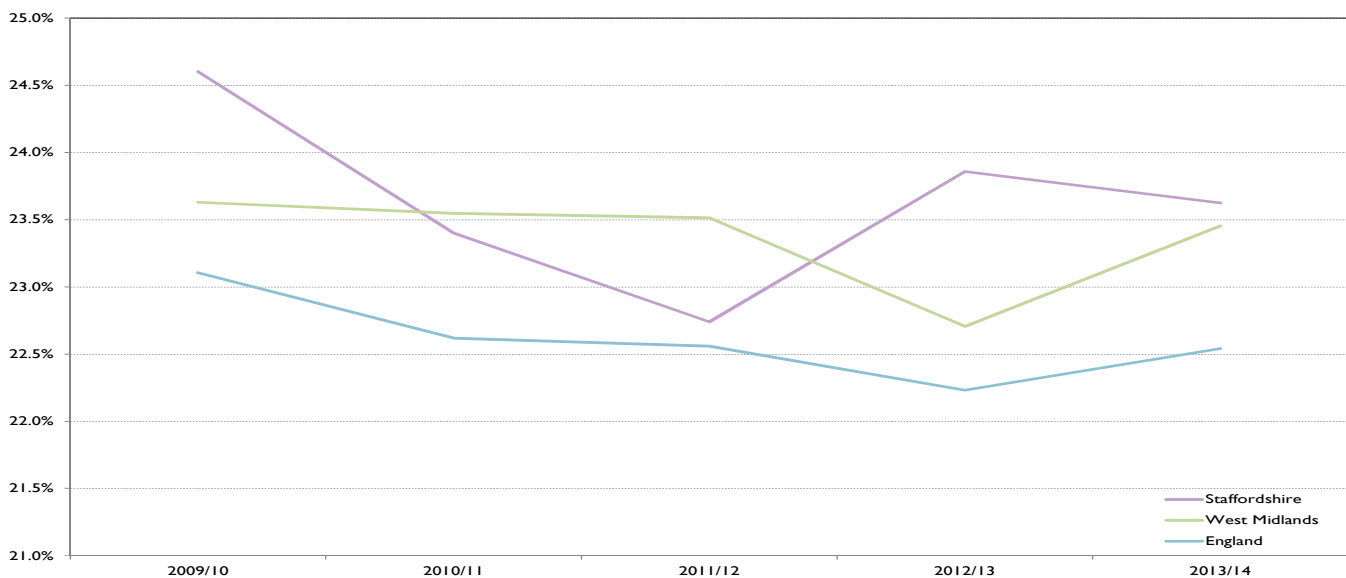

Childhood Obesity

Being obese increases the risk of diseases such as diabetes, hypertension (high blood pressure), cancer and heart disease. It can also lead to social and psychological problems, for example, depression, low self-esteem and stigmatisation, particularly in children. Excess weight can have an impact on many daily activities and on people's relationships.

DENTAL

Dental Health

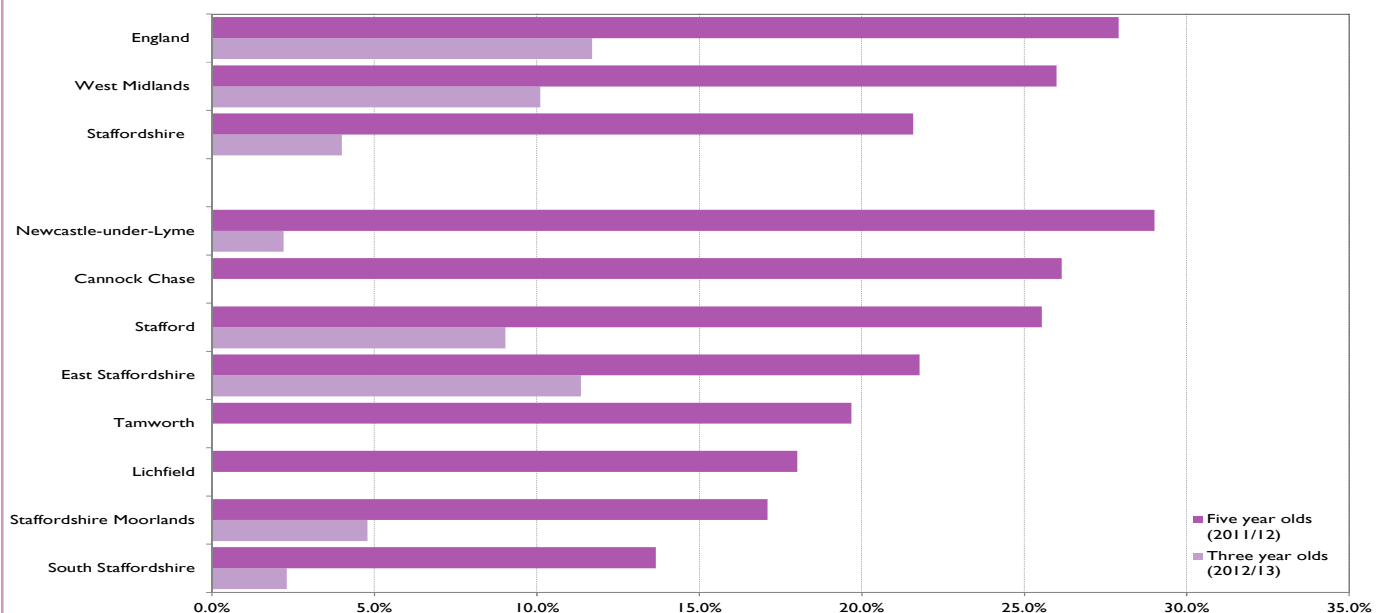

Tooth decay is particularly high amongst children who have poor weaning practices, poor diet (high or frequent uptake of food containing sugar) and inadequate use of fluoride toothpaste.

Dental decay experience is measured by recording the number of decayed teeth, missing teeth and filled teeth for each child. The average decay experience (mean number of decayed, missing or filled teeth) assesses the severity of the disease in populations.

Children aged three and five with tooth decay

	Three year olds (2012/13)		Five year olds (2011/12)

HOSPITAL ADMISSIONS

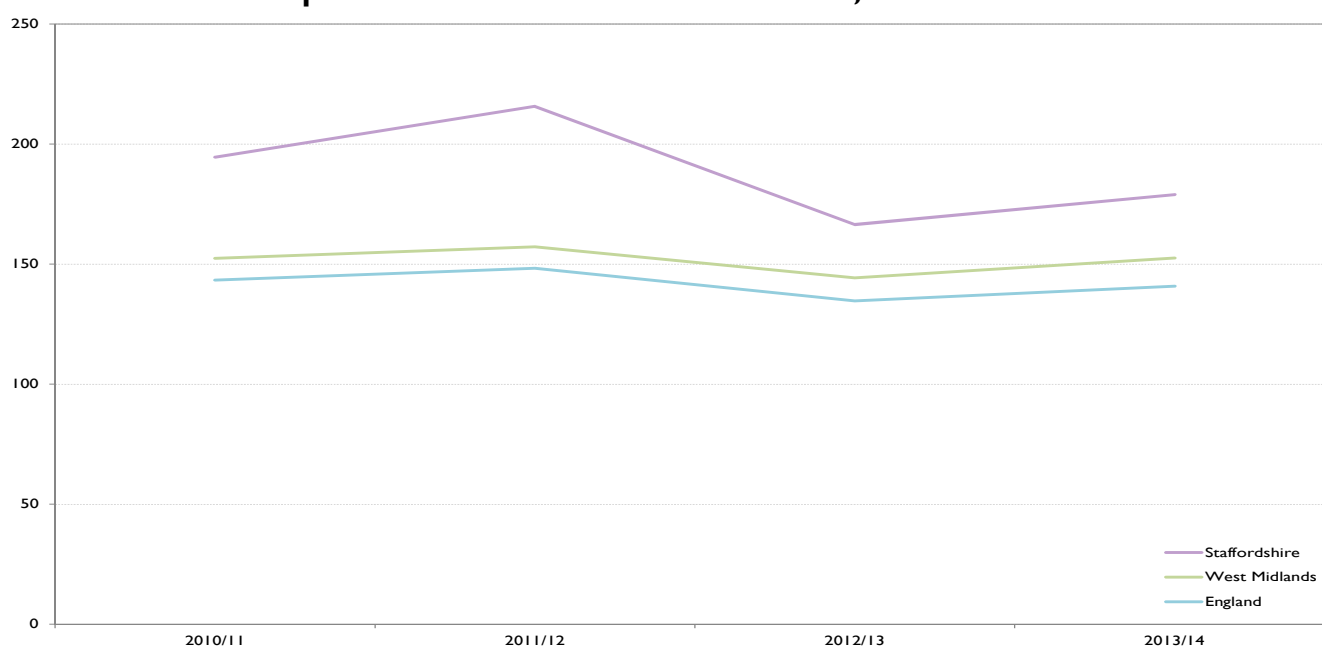

Hospital Admissions

Unintentional and deliberate injuries are the leading cause of admissions for children and are often higher for children from more deprived areas. Hospital admissions caused by unintentional and deliberate injuries for Staffordshire children aged under 15 and particularly those under five are higher than the England average.

Hospital Admissions caused by unintentional and deliberate injuries for children under 5 2010/11-2013/14

ACCIDENT AND EMERGENCY ATTENDANCES

Number of A&E attendances by children under 5, 2013/14 - 2014/15

	2013/2014		2014/2015		Statistical difference to England
	Number of times attended A&E	Rate per 1,000	Number of times attended A&E	Rate per 1,000	
Cannock Chase	2,874	497	2,500	438	Lower
East Staffordshire	2,891	396	3,045	417	Lower
Lichfield	2,973	567	2,963	569	Higher
Newcastle-under-Lyme	2,395	374	2,468	388	Lower
South Staffordshire	1,575	319	1,511	303	Lower
Stafford	2,417	356	2,321	350	Lower
Staffordshire Moorlands	1,885	402	1,809	396	Lower
Tamworth	4,041	812	3,940	812	Higher
Staffordshire	21,051	457	20,557	451	Lower
England	1,812,285	531	n/a	531	

Data as at 23rd September 2015

Note: Both Tamworth and Lichfield have minor injury units in their areas.

Data has been derived from dataset which is based on patients registered with a Staffordshire CCG practice and therefore excludes those patients who may be living in Staffordshire but registered with practices outside the area. This data is therefore not comparable with any nationally published data for districts. It is also likely to underestimate the number of attendances and admissions for children in Staffordshire but is useful to gauge a trend and any local variation in rates.

Number of A&E attendances by children under 5, 2013/14 - 2014/15

EARLY YEARS PUPIL PREMIUM (EYPP)

EYPP

Early years pupil premium is additional funding for early years settings to improve the education they provide for disadvantaged children. Children must receive free early education in order to attract EYPP funding.

EARLY YEARS FOUNDATION STAGE PROFILE (EYFSP)

EYFSP

The Early Years Foundation Stage Profile (EYFSP) is a teacher assessment of children’s development at the end of the academic year in which the child turns five. Following an independent review of the EYFS by Dame Tickell, a new profile was published for implementation for 2013 and therefore results before 2013 are not comparable to 2013 and 2014 results.

Good level of development is a term used to describe those pupils who achieve the expected level of development in terms of communication and language, physical development, personal social and emotional development, literacy and mathematics.

EARLY YEARS OFSTED INSPECTIONS

Ofsted 'Early Years' Inspections

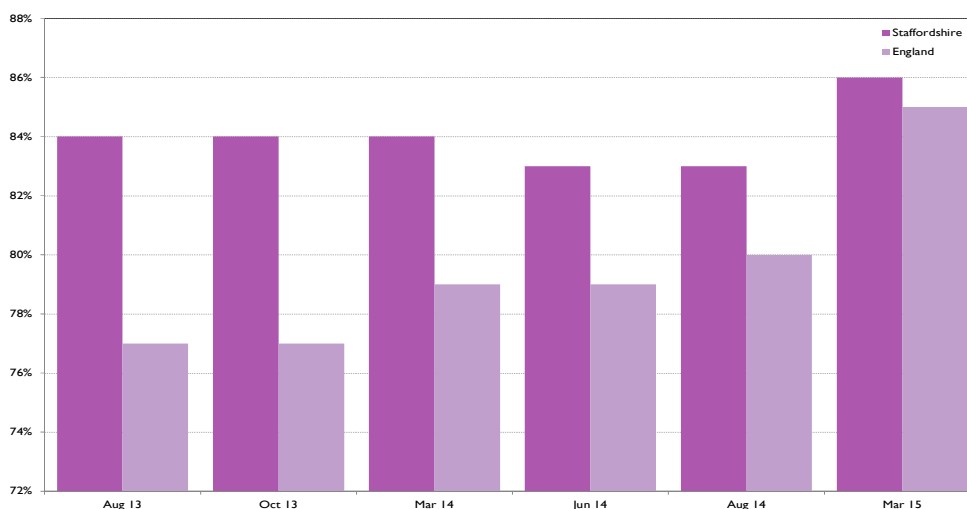

Ofsted evaluates the overall quality and standards of the early years provision in line with the principles and requirements of the Early Years Foundation Stage. Inspectors judge the overall effectiveness of the early years provision, taking into account three key judgements:

- How well the early years provision meets the needs of the range of children for whom it is provided;
- The contribution of the early years provision to the well-being of children;
- The effectiveness of the leadership and management.

Ofsted 'Early Years' Inspection Outcomes as at September 2015

	Number of Ofsted registered Providers					Percentage of Ofsted registered Providers			
	Outstanding	Good	Requires Improvement	Inadequate	Total	Outstanding	Good	Requires Improvement	Inadequate
Cannock Chase	7	56	12	1	76	9.2%	73.7%	15.8%	1.3%
East Staffordshire	15	78	11	2	106	14.2%	73.6%	10.4%	1.9%
Lichfield	20	64	13	0	97	20.6%	66.0%	13.4%	0.0%
Newcastle-under-Lyme	13	76	13	0	102	12.7%	74.5%	12.7%	0.0%
South Staffordshire	16	73	18	0	107	15.0%	68.2%	16.8%	0.0%
Stafford	19	91	18	0	128	14.8%	71.1%	14.1%	0.0%
Staffordshire Moorlands	13	66	10	2	91	14.3%	72.5%	11.0%	2.2%
Tamworth	13	79	10	1	103	12.6%	76.7%	9.7%	1.0%
Staffordshire	116	583	105	6	810	14.3%	72.0%	13.0%	0.7%
England	8,052	44,593	8,671	619	61,935	13.0%	72.0%	14.0%	1.0%

CHILDREN'S CENTRE OFSTED INSPECTIONS

Children's Centre Inspections

The inspection of a children's centre provides an independent external evaluation of its effectiveness and what it should do to improve. This is based upon a range of evidence including that from partner organisations, parents and prospective parents who use the centre and its services, and inspectors' first-hand observation.

All children centres are to be inspected under the new children centre inspection framework April 2013.

Ofsted Children's Centre Inspection Outcomes

Children's Centre	Inspection Date	Ofsted Grade
East Staffordshire	25-26 June 2015	Requires Improvement
South Staffordshire	17-18 June 2015	Inadequate
Cannock Chase	05-06 March 2015	Requires Improvement
Stafford	10-12 June 2014	Requires Improvement
Lichfield	13-14 May 2014	Requires Improvement
Newcastle-under-Lyme	Not yet inspected under the new children centre framework	
Staffordshire Moorlands		
Tamworth
